Basic

Summary

Full-stack Developer with a strong foundation in front-end and back-end technologies. Experienced in building backend APIs, CRUD modules, authentication flows, and data handling features. Interested in practical web applications, backend systems, and user-focused digital products.

Experience

Freelance January 2025 - Present

Full-stack Developer

Developed backend, web, and full-stack modules for game-related projects.

- Developed backend and web modules for game-related projects including CapybaraGo, MiniWorld Drop Ball Event, and Fun3GameHub.
- Built RESTful APIs using Golang and Gin, covering CRUD operations, authentication, and data processing.
- Supported server-side testing, debugging, and maintenance to improve reliability of event and gameplay-related services.

Projects

CapybaraGo

Server-side game-related module development.

- Developed backend modules and supported server-side logic.

MiniWorld Drop Ball Event

Server-side event module and testing for a game event system.

- Developed server-side features and participated in testing/debugging.

Fun3GameHub

Full-stack game hub project.

- Worked on full-stack modules, APIs, authentication, and data handling features.
